

## Counter-Racism Science Project

### Development of Counter-Racism Communication Skills using the Internet

#### Problem/Purpose

- What is your goal? Develop the Ability of the victims of racism/white supremacy to develop communication skills needed to counter racism/white supremacy using language
- What idea are you trying to test? The internet is a good training ground for learning counter-racism skills since it is the use of words in communication that is only way to inner act
- What is the scientific question you are trying to answer? What is the best thing to say and do when you are in contact with white people in any place and time

#### Hypothesis

- People are People on the internet until they are classified by the most powerful people. The Victims of racism/white supremacy can talk directly to white people, developing the skills to ask questions and think about them is a logical manner.
- Make a prediction regarding the outcome of your experiment. The white people must let the non-white people know that they are white people using words and or camera
- State the results you are predicting in measurable terms. The way the victim of racism/white supremacy conducts him or herself will start carrying over of the internet in speak and action based on what will be revealed from conversations with white people

#### Procedure

- Step 1. Set up a forum on the internet for conversation.
- Step 2. Play Audio Clips of what white people say about racism-white supremacy system
- Step 3. Put every thing said in the forum of a question
- Step 4. Do be polite at all times and do not argue
- When Truth is being revealed look for a change is the why the room will be distracted
- The white people will begin to get angry at the words being used.

#### Materials

- You will need a Computer with microphone and speakers. Down load a free-voice chat program (paltalk, yahoo)

#### Observations/Data/Results

- When Truth is being revealed look for a change is the why the room will be distracted
- The white people will begin to get angry at the words being used.

#### Analysis

- My data has shown me: That there are a range of responses white people will give from very angry to begin to reveal some truths with missing points or make suggestions that were never made before.
- Truth will not be revealed without stressing the system of racism/white supremacy and stress on the system does not happen without the proper words used.

#### Conclusion

- Truth will not be revealed without stressing the system of racism/white supremacy and stress on the system does not happen without the proper words used.
